

THE BONNETGARD™ COVER SYSTEM

A MODERN-DAY GLAMPING INNOVATION

PlainsCraft's Bonnetgard™ Cover System is an innovative solution designed for comfort, longevity, and appearance. Five layers protect from harsh weather, shadows, and noise. The system is highly efficient, weather resistant, breathable, and allows for a high level of privacy for guests.

EXTERIOR LAYER

The exterior layer is made from Aqualon Edge material, the next generation in high-quality outdoor fabric. Powered by Perfecta Marine® technology, it reduces the heat gain caused by UV rays. With welded seams, the outer cover resists water, cracking, fading, mildew, rot, and UV rays and retains a natural canvas color. It's easily cleaned with mild soap and water, plus includes a 7-year manufacturer's warranty for added peace of mind.

SECOND LAYER

An intentional air gap creates air flow, ensuring the benefits of the radiant barrier.

THIRD LAYER

An aluminum radiant barrier layer reflects heat outward and is perforated for breathability.

FOURTH LAYER

The fourth layer is an acoustic and thermal insulation batting.

INTERIOR CANVAS

The interior canvas is our traditional Sunforger® canvas, which is breathable, fire retardant, and mildew resistant. It meets CPAI-84 flammability specifications, is marine treated, and pre-shrunk.
